THE INSURANCE/CONGRESS.

SIXTH DAY'S PROCEEDINGS.

Important Reports on Assets, Fees, Taxation Beposits and Uniform Blanks.

PROBABLE ADJOURNMENT UNTIL OCTOBER.

The Congress of Insurance Superintendents and Commissioners met yesterday in room 52, Fifth Avenue Hotel, President George W. Muler in the chair. There was an informal discussion on generai matters while waiting for a quorum, but no conciusions were arrived at.

Mr. L. Breese, of Wisconsin, from the Committee

on Taxation, Fees and Deposits, reported:-

That in the matter of taration, as in the matters connected with insurance, we believe in uniffer y and full recurrency between the different States. The tree, while we recommend that every State be left to regulate the taration of its own companies, your committee would suggest that a tar of one and one-half per centum of the gross premiums of every insurance company should be charged in every state except the State in which it is organized, to be in lieu of all other taxes.

of all other taxes.

FEES.

For filing charter, \$25; filing annual statement, \$29; for such agent's certificate of authority, \$2; for copies of records, 80c, per folio, and affixing seal and certifying thereto, \$1; for valuing hit policies, \$10 per \$1,000,000 of insurance or any fraction thereof, and for official examination the actual

Expenses lacurred.

DEPOSITS.

Your committee deprecate the requirement of deposits in various States as a condition of the companies of other States doug business therein. In reference to life companies your committee are of opinion that a deposit should be required in the State where organized of at least \$100,000, to be held in trust for the common protection and benefit of all its policy holders. In relation to fire and markie companies no deposits whatever are deemed necessary, except in the case of companies of foreign countries, and as to them we recommend that a single deposit of at least \$200,000 er equired in the State where its principal office is located, to be held in trust for all its policy holders in the United States.

The report was received and ordered to be printed. The report was received and ordered to be printed,

Mr. Caldwell dissenting from the majority report.

The resolution to adjourn on Thursday until the third Wednesday in October was called up and dis-cussed, many members being in favor of such adjournment. Mr. Paine declared that discussion so far showed that the delegates are not agreed upon some matters, and it was very doubtful if one could now agree on the points sought to be harmonized. For this reason he would support an adjournment, but wished that the reasons for the non-agreement of the Congress be put before the country in the form of a preamble and resolution. A committee of three was appointed to draw up a resolution on the subject of an extra session in October.

Mr. Skeels, from the Committee on Reciprocity and Miscellaneous Business, presented a report in favor of free trade in insurance consistent with the interests of the public. The report is as follows:—

The committee having in charge miscellaneous subjects not

The committee having in charge miscellaneous subjects not specially referred to other standing committees beg leave to report that such matters as have been suggested for consideration have been weighted with as much deliberation as the limited time at our disposal would admit, and the following views and conclusions are submitted for the consideration of

ation have been weighed with as much deliberation as the limited time at our disposal would admit, and the following views and conclusions are submitted for the consideration of the Convention.

That class of insurance legislation which is termed reciprocal or retailatory had its origin in the passage of laws commonly termed deposit laws, which required of companies incorporated by other States as pre-requisite to permission to establish agencies a deposit with the chief financial officer of the State securities designated classes, as indemnity for the proper fulfilment of contracts of insurance. The first State is ensured that was a policable only to life insurance companies, and was general in its application of domestic and foreign companies from other States. Then followed, in 1858, the deposit law of Indiana, requiring a lodgment of five per cent of all premiums received by tire as well as life insurance companies until the amount reached \$25,000. Other States followed, enacting similar laws, all tending to embarrass the employment of capital, and hedring in by legislative Chinese wails the usefulness of corporations organized with millions of capital for security, and possessing credit beyond question. For a series of years the most serious apprehensions prevailed lest all reciprocity in the employment of insurance capital would be destroyed. Indeed, it became esigent that a change in the growing will employ ment of insurance capital would be destroyed. Indeed, it became esigent that a change in the growing will must take place of the old and experience agency companies would be compelled to retire within narrower limits and the business be assumed by a class of new local organizations untried by the ordeal of experience, true entailing possible and probable disaster to the great commercial interests of the country. But the working of the pernicious system soon becan to demonstrate its lift effects, and we have witnessed the repeal of these obnotious laws by several

witnessed the repeal of these obnozious laws by several States. California, Wisconain and Ohio, once contaminated, are now regenerated.

We are not prepared to hold that States which have passed retailatory laws are reprehensible. The famil lies with the States which placed upon their statute books laws discriminating in favor of home institutions and laying burdens upon those of other States. Indeed it may be justly inferred that but for this retailatory legislation we should have with pessed in place of recessing clauses the enactment of still more invidious distinctions between domestic and other State corporations.

For these reasons we do not condemn retailatory legislation, but rather do we reprobate the cause therefor. The committee do not deem it necessary to enlarge upon the very able arguments made before the convention by the various committees who have addressed us, showing the ill effects which must inevitably ensue to commercial enterprise and thrift of every kind if there is not a change in the appirit of the people of the different States which dictates legislation, exacting deposits and imposing severe taxation. It has been convincingly shown that just in proportion as a State imposes disabilities, taxes and expenses upon insurance capital, so must be properly of the bishaboo. The assertance capital, so must be properly of the sinkence. The assertance and the form of increased raising the market for depreciating bonds, but the minimal propers of the sinkence of the committee is not on shances. It has been demonstrated by the most convincing arguments of the very able report of the committee of the Chamber of Commerce, as well as by the reports read before us from the response of the committee of the Chamber of Commerce, as well as by the reports read before us from the response of the committee of the Chamber of Commerce, as well as by the reports and the secondary contracts and the committee of the Chamber of Commerce, as well as by the reports of the committee of the Chamber of Commerces, as enure to the state by the collection of an onerous tax or in making a market for depreciating bonds, but the unwritten law, which unerringly regulates the balances. It has been demonstrated by the most convincing arguments of the very able report of the committee of the Chamber of Commerce, as well as by the reports read before us from the various underwriting organizations, that the security of the policy bolder is not enhanced by the segregation of the capital of the company in various state depositories, and the usefulness of the company in possible emergencies is correspondingly lessened. Your committee of the capital of the company in possible emergencies is correspondingly lessened. Your committee of the capital of the capital of the capital of the control of the capital wars, of the capital and commerce will in due time counterval such tems porary gain. But, while the country awaits the practical emonstration of these actions and in case the company exercises mixed powers the assets pertaining to life insurance separated from other assets and disfinctly stated in all statement and advertisements of such company. If this requirement case the make and a similar one applicable to domestic companies exacting a full statement of liabilities in all publications made, the convenience of the public will be greaty enhanced. Four committee would by no incans depreciate the proof position at present attained by American Insurance capital under the fostering care of State legislation, our system of insurance supervision, defective as it is in hoot partitionism is confession, and the capital concessions we can eliminate some of the incongruits within a few years. This is a fact

Resolved. That a committee be appointed to gather mor-tality statistics and experience of American life insurance companies as far as practicable, and that the companies of requested to furnish said committee with the information de-sired. Referred to the Committee or Valuations, &c.

tee was called up for discussion.

Mr. Skells, of California, advocated the abolition of the deposit system by fire and marine companies, but was in favor of some deposit by life companies, but was in favor of some deposit by life companies.

adopted.

The report was read section by section and the adoption of it deferred until the Committee on Taxation, Pees and Deposits reports.

Mr. KELSEY, from the Committee on Blanks, submitted a uniform form for annual reports as follows:—

Interest a uniform for annual reports as lotmitted a uniform to be adopted, except such as are necesary to conform to the respective State statutes. The committee declare that the item "premiums in due course of collection," it will be observed, had been omitted, and in lieu
two lieus inserted, viz. i—"Amount of premiums collected
and recorted by agenta, but not yet received at
the Home Office," and "premiums due which the
company are bound to receive as tender." The latter item is
inserted for the accommodation of the companies which
asiow grace in the payment of premiums. The forms are
come idered as presenting the only condition of premiums not
yet paid into the company's bands, but rather as substantial
assets which as true observance of those sound principles
which must underlie all successful business and especially
which should be observed in the business of insurance—preemmently so in life insurance—will warrant. Touching the
matter of a detailed statement of securities of various
kinds belonging to companies your committee would recommend that, after furnishing an itemized test of all assets on
the entirance of a pompany to due business in another

State, the list of mortgages held by a company shall be required to be reported in annual statements only to the officer having supervision of insurance in the State where the company is organized, and that the company forward to other States the certificate of such officer that such detailed abstract has been properly furnished; that the certificate of mortgages or other securities deposited for the benefit of policy holders shall be made by the officer of the State where the deposit is made only after an actual examination of title appraisement and valuation by a person duly commissioned by him for that purpose. The Congress still have the report on banks under iscussion, and will meet at ten o'clock this

FINANCIAL AND COMMERCIAL.

WALL STREET, TUESDAY, May 30-6 P. M. On 'Change to-day wheat was firm and better. The cotton market was steady and strong.

A HALF HOLIDAY IN WALL STRUET. The Stock Exchange and Gold Board adjourned soon after noon, and the only transactions subsequent to one o'clock were conducted in a desultory market on the sidewalk in Broad street. The adcournment was as merciful as appropriate, for the close atmosphere of the Open (*) Board, in which the stock market is temporarily located, was highly detrimental to the comfort, if not the health, of those who were compelled to attend there in the execution of their business. Out of respect to the day the flag on the Stock Exchange was lowered to half-

The money market was easier, with three per cent as the general rate on call loans, with exceptions at two and four per cent. Owing to the half holiday a great number of loans stood over undisturbed. Prime commercial paper was dull and quoted 434 a 5% per cent discount.

Foreign exchange was quiet and barely steady at previous quotations.

GOLD DULL-111% A 111%. The gold market was intensely dull. The sales in the morning were all at 111% and 111%, but toward three o'clock there was considerable relaxation and the quotation changed to 111% a 111%, and sales occurred at 111%. The final sales were at 111%, with more gold offering at the same price. In the loan market the rates ranged from 3 per cent for carrying to flat for borrowing. The operations of the Gold Exchange Bank were as follows:-
 Gol1 cleared
 \$27,428,000

 Gold balances
 1,304,214

 Currency balances
 1,472,486

The European steamer took out \$350,000 in specie.

GOVERNMENTS STEADY. The government list was steady and without important alteration. The currency sixes, as natural in a time of such easy money, were firmer. A leading firm on Broad street is offering the new five per cent bonds at 111% currency, which is % per cent below the price of Mr. Boutwell. The market closed as follows:-United States currency sixes, 115% a 116; do. do., 1881, registered, 117% a 117%; do. do., coupon, 117¼ a 117¼; do. five-twenties, registered, May and November, 111⅓ a 111¼; do. do., 1862, coupon, do., 111% a 111%; do. do., 1864, do. do., 111% a 111%; do. do., 1865, do. do., 111% a 111%; do. do., registered, January and July, 113% a 114; do. do., 1865, coupon, do., 113% a 114; do. do., 1867, do. do., 113% a 114; do. do., 1868, do. do., 113% a 114; do. ten-forties, registered, 109% a 100%; do. do., coupon, 109% a 109%.

STOCKS STRONG AND HIGHER. The dealings at the Stock Exchange were confined chiefly to the three or four stocks which have been the features for the past few weeks. A raid was made on New York Central by the "bears," in anticipation of a sharp decline to follow the decision of Commissioner Pleasonton on the subject of the tax of \$1,150,000 on the eighty per cent scrip dividend declared in December, 1868. This movement seemed to excite the ire of the "Commodore," for he sent his agents into the market and not only accepted all the stock which the "bears" offered down to 98%, but turned the price upward to 100. Rock Island advanced to 121%, but teading was weak and went off to 118%. Pacific Mail was strong in anticipation of the annual stateand Mississippi, after recovering to 49%, fell off to 48% on a rumor that the pool had marketed their stock and ceased operations in it. The extreme nuctuations of the day in the principal stocks are

stated in the table:—	
Highest,	Lowest.
New York Central consolidated100	9844
